# OPPORTUNITY FOR PUBLIC COMMENT ON ROCKY FLATS CLEANUP

The U.S. Department of Energy recently began the cleanup of environmentally contaminated areas at the Rocky Flats Plant. The plant, which produces nuclear weapons components for the nation's defense programs, is located approximately 16 miles northwest of Denver. Public comments on proposed plans for cleanup play an integral role in how cleanup is accomplished.

This notice invites public comment on the U.S. Department of Energy's Proposed Draft Surface Water Interim Measures/Interim Remedial Action Plan and

Decision Document for the 903 Pad, Mound and East Trenches Areas (Operable Unit No. 2). Operable Unit No. 2 is one of 16 areas slated for environmental restoration at Rocky Flats as determined by the U.S. Department of Energy, the U.S. Environmental Protection Agency and the Colorado Department of Health.

Interested parties can submit written comments on the Interim Measures/Interim Remedial Action Plan during the 60-day public comment period, which begins September 26, 1990, and ends November 24, 1990.

A public meeting for the presentation of oral comments will be held

Please submit written comments to

**TUESDAY, OCTOBER 23, 1990
